Your Reliable Source for Solar Systems

solar is the future

Sun Systems has established a dedicated training centre for all levels of skills. Our solar training courses are certified by **BPEC** and unlike other companies we also provide on-going technical support to course attendees. This is invaluable in the early days of your new skill.

All of our training courses are held at our new state of the art training school in Tewkesbury, Gloucester. A large investment in our training facility has ensured that **Sun Systems UK Ltd** can offer you the most comprehensive solar thermal training courses in the industry.

the training course:

Our **BPEC** approved trainers have years of experience in the installation of thermal solar systems which means that you will have the very best training in the practical aspect of installations rather than just the theory.

The course consists of:

- Solar heating theory
- Installation techniques
- Collector roof/wall/freestanding installation
- Performance of solar equipment
- Planning and surveying
- System commissioning
- Solar assisted swimming pool installation
- Space heating and underfloor heating with solar
- Servicing of the systems

On completion of the course you will receive a **BPEC** certificate of training, and automatically become a **Sun Systems approved installer**.

the advantages are:

- Discounts on a huge range of Sun Systems products
- Access to any sales enquiries in your area
- Quick delivery from stock
- Technical back up just a phone call away
- Design assistance
- Local authority planning advice

the future is solar - make it yours
